SELECT WITH SERVICE BUTTON AND PRESS TEST BUTTON

The above contents are different from those applicable at the time of shipment of the game machine.

· GAME DIFFICULTY

Is used to set basic degree of difficulty of the game.

·DIFFICULTY OFFSET

Is used to set whether you want to set the level of difficulty at each stage. When set to OFF, the level of difficulty can be set only by using GAME DIFFICULTY.

When set to ON, you can increase or reduce the level of difficulty at each stage.

·PLAYER STOCK

Is used to the player stock number at the beginning of the game.

· BOMBER STOCK

Is used to set the bomber stock number appearing on the player's machine.

· EXTEND TYPE

Is used to set the increase in play stock when set score is reached.

· PAUSE SW

Is used to set whether or not you want to have pauses associated with the 56P connector d pin.

· INVINCIBLE MODE

Is used to select the no-enemy mode for checking to on or off.

- · ADDITIONAL MODE
- Is used to set whether or not you want to use the special functions associated with button input status at the beginning of the game.
- · CONTINUE

Is used to set whether or not you want the CONTINUE function.

·DEFAULT SETTING

Is used to restore all settings above to the initial condition.
